EDUCATION

Computer and Information Systems Engineering Semester-6-3.544 CGPA NED University of Engineering and Technology

10/2020 - Present

Courses

- Computer Programming
- Data Structures and Algorithms
- Software Engineering
- Computer Communication Networks
- Operating Systems
- Object Oriented Programming
- Database Management System
- Machine Learning
- Artificial Intelligence
- Software Development and Testing

Intermediate-Pre-Engineering-89.09% Adamjee Government Science College

09/2018 - 04/2020

CERTIFICATES

Python for Data Science, AI and Development IBM

WordPress Development DigiSkills

Data Analytics and Business Intelligence DigiSkills

Version Control Meta

EXPERIENCE

Karachi Development Authority (IT Department)
(03/2023 - 04/2023)

Intern

Neuro Computation Lab, NCAI, NEDUET.
(09/2022 - 10/2022)

Intern

SKILLS

React.js

WordPress (Elementor)

Python (Numpy & Pandas)

php & Laravel

RestAPIs

Data Science

Version Control (Git and GitHub)

Bootstrap

MS Office

MySQL

Software Testing

PROJECTS

React JS Webpage

- Expense Tracker recording expenses and a Restaurant Webpage displaying menu based on categories.
- A weather application (with real-world API) displaying complete weather information about a searched city.

WordPress

- A blog website, a restaurant website, and a news publishing website using Elementor Page Builder and different themes.

SQA

- For ecommerce and library web applications, all necessary test cases were designed and executed through complete STLC.

PHP and MySQL

- CRUD application, adding, reading, updating and deleting records from database.

Machine Learning

- Weather prediction models with 3 different algorithms on weather dataset.
